

# INDENT CRIMPING KIT

An affordable Indent crimp tool kit with 2 positioners and accessories.

These crimp tools perform the professional 8 indent style crimp required on solid bucket contacts. The tool has the industry common bayonet fitting which is compatible with WireTrain and DMC AFM8 positioners.

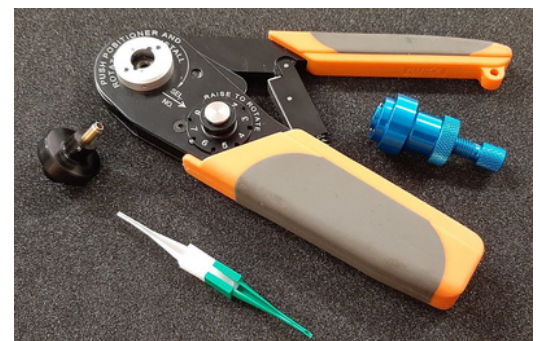

The adjustable crimp level dial and forced cycle mechanism ensure a high performance crimp every time. Contacts are held centrally and at the correct depth by the removable positioners.

Suitable for a most solid bucket (AKA turned bucket) style contacts from #20 to #28 gauge. This covers contacts by Deutsch, Souriou, T&B, TE Connectivity and many more. Fully compatible with the Deutsch AutoSport and Souriou 8STA connectors families used widely in motorsport applications.

Supplied in compact case with 2x WireTrain Positioners, Adjustable positioner, De-pinning tools and contacts storage. Everything you need in an indent crimp tool kit, ideal for the workshop or race truck.

Choose the two positioners you want from our range of positioners. See Positioner Leaflet. Additional slots for further positioners as your requirement grows. The case allows for expansion with cutouts for 8 positioners and 8 slots for holding pins and sockets.

Everything you need in an indent crimp tool kit

## FEATURES

- Crimp indent dial with positions 1 to 8 ensure the correct level of crimp indentation for a given wire and bucket combination
- Comfortable rubberised grips for easy crimping
- Forced cycle mechanism to ensure consistent crimping
- 8x 'Green & White' de-pinning tools used across a wide range of Deutsch and Souriou connectors.
- 1x adjustable depth positioner aiding the crimping of contacts even if you don't have the correct positioner available.
- Excellent build quality and precision giving an equivalent crimp to that of the industry leading crimp tools.
- Not recommended for Military, Aviation or other applications requiring a full certification trail.
